Wishing you the happiest of the Holiday Season!

A. PRICING RATES AND TRANSPORTATION INFORMATION

For Pricing, Royalty Rates and Transportation Information for October 2009, refer to Attachments 1, 1A, 2, 2A and 3. These attachments are also available in Excel Format.

B. NOTICES

Office Closures – Christmas Period

Alberta Energy offices will be closed from Thursday, December 24 to Monday, December 28, 2009, inclusive and on Friday, January 1, 2010.

Statutory Requirement and Recalculation of 2005 Royalty

A production year becomes statute barred on December 31st, four years after the end of a production year. Once a year has become statute barred, calculation or recalculation of royalty does not occur on a monthly basis. Section 38 of the Mines and Minerals Act provides for recalculation of royalty that can be initiated in two ways:

1. On the department's initiative in conjunction with an audit or examination; or
2. At the request of a royalty payer.

Department Initiated Amendments
For a list of Deep Gas Royalty Holiday (DGRHP) wells that require the fifth (5^{th}) year to be open for the 2005 production year, refer to Attachment 7. These wells are under review for the DGRHP program and the exemption, if approved, will be applied in 2010.

Audits in Progress
Non-operator partners are advised that certain 2005 allowable costs, custom processing fees, capital costs and custom processing adjustment factor (CPAF), and volumetric reporting discrepancy audits are currently in progress.

However, **completion of the audits and royalty recalculations and assessments, if required, will occur in 2010. For an initial list of the affected ERCB facilities, refer to** Attachment 4. Further updates to this list may be included in the January 2010 Information Bulletin.

Royalty clients are also reminded that amendments received by the department in the fourth year following the production year may be subject to audit. If the amendments are received late in the fourth year and insufficient time is available for the department to commence a review of the amendments prior to the end of the year, the department reserves the right to commence the audit at the beginning of the fifth year.

If you have any questions, please contact Kris Pretty, Manager, Compliance and Assurance, in Calgary at (403) 297-8785.

Industry Recalculation of 2005 Royalty
Industry initiated royalty recalculation requests for the 2005 production year must be submitted in writing to the attention of Wayne Taljit, Manager, Client Services, Gas Royalty Calculation.

This request must be received by the department on, or before, December 31, 2009, and it must include the following:

- Identification of the recalculation facility or facilities;
- Listing of the royalty variables proposed for recalculation;
- The reason for the recalculation;
- The production years of the recalculation;
- An order of magnitude estimate (i.e. >$100,000, >$1 Million, >$2 Million, etc.) of the recalculation requested;
- Identification of all royalty clients that may be impacted by the request; (this is necessary, especially in situations where the client is going to cascade volumes to another client that has to report them);
- The recalculation and its impact;
- The time lines for recalculation preparation and submission to the Crown including a reasonable time frame for the Crown to review the recalculation;
- Confirmation from the operator that the affected partner(s) have been notified; and
- Paper copies of documents to be processed (one sample for a particular month is sufficient).

If you have any questions regarding this process, please contact your respective Gas Royalty Client Services portfolio representative as identified in Section F of this bulletin.

Royalty Liable Gas Used for Fuel (PURREC/PURDISP)

The department is still reviewing volumetric dispositions of gas, reported on the Petroleum Registry of Alberta (PRA), from batteries, gathering systems or gas plants to batteries or gathering systems for the purpose of gas sold and used for fuel. This review is for the production years 2005 onwards and is to be completed in 2010. The objective of the review is to ensure that all gas sold and used for fuel is accurately reported on the PRA to facilitate Crown royalty calculation.

Effective June 4, 2009, when there is a sale of gas or transfer of ownership within the royalty network, the selling facility is required to report PURDISP, which would then auto populate the PURREC for the purchaser (receiving facility). This enhances the controls to prevent fuel sale gas volumes from being incorrectly reported in PRA. This new reporting method also applies to all prior period amendments completed after June 4, 2009.

A purchase disposition (PURDISP) is a volume of product that has been sold by a facility to another facility within the royalty network. A PURDISP of gas is subject to Crown royalty charges. For example, effective June 4, 2009, if a Gas Plant (GP) sells gas for fuel to a Battery (BT) each month, the reporting is:

1. The GP operator must report a PURDISP.

2. This will auto populate a PURREC at the BT.
3. The GP operator must then file a SAF/OAF for the PURDISP.

All parties should take steps to ensure that in network sales or transfers of gas are correctly reported in the PRA. This is applicable for year 2005 to current.

RGA Allocations

The Department will be conducting a review of all amendments received for RGA Allocations, including the ones with out-of-province destination, for the production year 2005. This review will be completed in the calendar year 2010.

Unit ID Listing Changes

Currently on the Alberta Energy website, we provide a Unit ID listing that is updated on a monthly basis. The information provided is the Unit ID, Unit Name, Unit Effective Date, Unit Termination Date, Current Operator Name and Operator Effective Date.

Effective December 2009, we will be adding two additional information components, which will be Unit Amended Eff Date and Amendment as of Date. The Unit Amended Eff Date provides the production period in which an amendment has been applied to the unit. The Amendment as of Date provides which calendar date the amendment was updated in our system.

As done previously, this listing will be updated on a monthly basis before the infrastructure cut-off deadline.

If you have any questions, please contact Penny White at (780) 422-8083.

New and Revised Meter Station Factors

The department has published in Information Letter 2009-41, new and revised Meter Station Factors. Meter Station Factors for new meter stations are identified in Attachment 5 and are effective for the production periods November 2008 to September 2009. Meter Station Factors identified in Attachment 6 are effective the October 2009 production period and subsequent production periods until otherwise changed.

If you have any questions, please contact Bill Zanewick, Director, Gas Royalty Valuation and Markets at (403) 297-5465 or e-mail at bill.zanewick@gov.ab.ca.

Alberta Energy – Gas Royalty Calculation Calendar

A 2010 calendar is enclosed, which provides critical filing dates that clients are required to meet with respect to Gas Royalty processing cut-off periods.

C. MONTHLY INFORMATION

October 2009 Royalty Due January 31

- **Royalty clients are to remit the total amount payable shown on the January 2010 Statement of Account by January 31, 2010.** If the amount payable includes accrued current period interest, the interest has only been accrued to the statement issue date. Clients must also include the additional interest that has accrued from the statement issue date to the date of payment, using the per diem amount provided.

- **The January 2010 Statement of Account shows your amount payable as of the Statement issue date. It includes any outstanding balances from your previous statement, your October 2009 invoice amount and any applicable current period interest charges. It also identifies refunds resulting from overpayments.**

- Current period interest will not be charged on current invoice charges for the production month of October 2009 if it is paid in full by January 31, 2010.

- Current period interest will accrue on any overdue charges commencing the first day after the due-date until it is paid in full.

  Note: If the due date falls on a non-business day, the next business day will apply as the due date.

- Cheques are payable to the Minister of Finance, Province of Alberta.

November 2009 VA4 Due January 15

The VA4 forms for the production month of November 2009 are due in the department offices by January 15, 2010.

Note: If the due date falls on a non-business day, the next business day will apply as the due date for VA4 forms.

Registry Deadline Submission

The Registry deadline submissions for SAF, OAF, and Volumetrics are posted in the Petroleum Registry of Alberta website "Reporting Calendars" under Calendars.

Changes to this calendar will be posted on the Registry website home page in "Broadcast Messages."

Interest Rate December 2009

Alberta Energy's interest rate for December 2009 is 3.25%.

September Provisional Assessment Charge

The summary of Provisional Assessment Charges for all production periods in the September 2009 billing period was:

First Time Provisional Assessment	Reversals of Provisional Assessments	Net Provisional Assessment
$1,966,821.84	($1,744,765.63)	$222,056.21

September Penalty Charges

The penalty table below shows at the form level, the total penalty charges and reversals, for the September 2009 billing period:

FORM	Penalty Charges	Penalty Reversals	Net Penalty Charges for 2009/09
AC2	$9,700	$1,000	$8,700
AC4	$200	$0	$200
AC5	$5,700	$0	$5,700
NGL1	$0	$0	$0
VA2	$0	$0	$0
VA3	$0	$0	$0
VA4	$500	$0	$500
Total	$16,100	$1,000	$15,100

Gas Royalty Calculation Support

Upon request, Gas Royalty Calculation staff will be available to meet with clients who need assistance with royalty reporting. Royalty clients requiring assistance are encouraged to contact your respective Gas Royalty Client Services portfolio representative, as identified in Section F of this bulletin, to arrange a meeting.

Well Event Measured Depth Determination Letter

The department has issued a "Well Event Measured Depth Determination Letter" under the Report Package DOE – Gas to facility operators via the PRA on December 1 and 15, 2009. This letter

shows the confirmed Measured Depth (MD) of each active well event that will be used to calculate the Depth Factor (DF) of the quantity component rate under the new royalty formula. A well event that is not listed on the letter and does not have a confirmed MD will receive a DF of 1. When the changes to the MD are confirmed by the department, a letter is issued to a facility operator who reports changes through the PRA to well event attributes affecting MD. All changes to the MD are applied on a go forward basis only, if a retroactive change is required, a written request must be submitted to the department. Facility operators are advised to submit well event attribute changes by the last day of the calendar month in order for timely determination of MD.

D. INFRASTRUCTURE DATA CHANGES

Client ID Listing

The BA Identifiers Report is a directory of Business Associate (BA) names, codes, status (e.g. struck, active, amalgamated, etc.), status effective dates, and effective August 2004, includes Working Interest Owner (WIO) role start/end dates.

This report is also published daily on the Petroleum Registry website at:

http://www.petroleumregistry.gov.ab.ca

The department reminds Business Associates to review their WIO role to ensure that the start and end dates are reflected correctly. If the BA does not have an active WIO role, the operators cannot allocate volumes to the BA for the relevant production periods through the SAF/OAF allocations.

- If a BA has a WIO role, then that BA can receive SAF/OAF allocations from the WIO role start date forward.
- If a BA has a WIO role with an end date, then they can only receive SAF/OAF allocations from the WIO role start date until the end date. Any SAF/OAF allocations after the end date will be rejected.
- If a BA does not have a WIO role start date, then that BA cannot receive SAF/OAF allocations.

Please contact Client Registry at 780-422-1395 if you have any questions regarding the information supplied on this listing.

Client Status Changes

Clients must ensure that all royalty documents are completed using only valid client names and IDs. It is critical that royalty clients use current legal client names and their appropriate IDs on all documents to ensure accurate royalty calculation and to prevent provisional assessment and penalties. Rejects will occur when invalid IDs are used.

If you require information regarding client names or IDs, please contact Client Registry at 780-422-1395.

Nova Tolls - Multiple Gas Reference Prices

Royalty information related to the implementation of the Factor Model negotiated with industry for determining Multiple Gas Valuation Prices is provided on the Natural Gas website's Royalty Related Information page under Facility Royalty Trigger Factors and Meter Station Ties.

E. REMINDERS

Operating Costs Subject to Recapture

The Potential Operating Costs Subject to Recapture report for the 2008 production year was generated for the last four months and sent to the Registry. Operating costs are recaptured from a royalty client who has volumes at a facility but have no capital allocations (AC1, AC2, or AC3) and no reported custom processing fees (AC5). A royalty client who is not an owner at a facility is not entitled to the operating costs they received on a monthly basis. The operating costs subject to recapture were charged in the August 2009 billing period invoice, issued in October 2009. It is recommended that all royalty clients with 2008 production check for these charges, plus associated prior period interest, on the August 2009 billing period invoice under the charge type Annual Custom Processing Fee Adjustment.

Update to the User and Department Defined File Handbooks

Effective the December 2009 billing period invoice, issued in the calendar month of February 2010, the following changes to EDI documents will be implemented:

INVUDF

- All dollar fields have been increased to 17 characters wide. (record 33)

CRDUDF

- All dollar fields have been increased to 17 characters wide. (records 34, 51, 61, 90)

DDF

- Two more annual invoicing reports are now available in an optional electronic format:
  1. Facility Effective Royalty Rate
  2. Annual Operating Cost Allowance

- The type of DDF file can be determined by the name of the file. The CERR file contains the letters CERR, the Capital Cost Allowance filename contains the letters CCARPT and the

  Custom Processing Net of Operating Costs file contains the letters CPNTOP. The FERR filename contains the letters FERR, and the Operating Cost Allowance filename contains the letters OPARPT.

- The fifth record of the CERR or FERR file is a Royalty Rate Product Record (Record type 13).
- The fifth record of the CP file is a CP Product Record (Record type 12).
- The fifth record of the OP file is an FCC Op Costs Record (Record type 14).
- The fifth record of a CCA file is a FCC Facility Record (Record type 11).
- EUB has been updated throughout the document to ERCB.
- All dollar fields have been increased to 17 characters wide.

Software providers and industry members that have requested this information, from the Business Systems Coordination team, have been notified of this change. As a precaution and to ensure that all software providers have been notified please forward this information as deemed necessary.

For further information or to coordinate testing of these changes, please contact Mary Spearing at (780) 422-9261.

F. POINTS OF CONTACT

Petroleum Registry of Alberta

The Petroleum Registry of Alberta Service Desk is the focal point for communications with the Registry regarding preparations for, access to, or utilization of the Registry. To contact the Petroleum Registry of Alberta Service Desk:
Phone: 403-297-6111 or 1-800-992-1144
Fax: 403-297-3665
Email: petroleumregistry.energy@gov.ab.ca

Alberta Energy Internet

Prices, Royalty Rates and Transportation Information are available on the Alberta Energy Internet address: www.energy.alberta.ca, from "Our Business", navigate to "Natural Gas", "About Natural Gas", "Prices", "Alberta Natural Gas Reference Price (ARP)".

In addition, both the Gas Royalty Information Bulletins and Information Letters are also available under "Our Business", navigate to "Natural Gas", "Legislation, Guidelines & Policies".

Gas Royalty Client Services

Gas Royalty Client Services is structured as a Business Associate client portfolio system, which assigns a given Business Associate to one of four Client Services teams. Listed below is the

portfolio breakdown along with Client Services Team Leads and phone numbers. The portfolios are divided by company name and not by BA ID.

Example: If your company name is the "Gas Company" you would call C – G team at 780-644-1202.

Numbered companies, A, B & L	780-644-1201 GRCST1@gov.ab.ca	Todd Atwood
C – G	780-644-1202 GRCST2@gov.ab.ca	Lily Hiew
H – P (excluding L)	780-644-1203 GRCST3@gov.ab.ca	Chris Nixon
Q – Z	780-644-1204 GRCST4@gov.ab.ca	Jyoti Bhambhani

Gas Royalty Reception: 780-422-8727
Fax: 780-427-3334 or 780-422-8732
Alberta Toll Free: 780-310-0000

Hours of operation are 8:15 a.m. to 4:30 p.m. Voice messages left after 4:30 p.m. will be answered the next business day.

In situations where a company has just amalgamated or purchased another company, the general rule is to call the team that is responsible for the "Supra" business associate, or Royalty payer. Below are some guidelines for clients who are unsure which Client Services Team to call regarding their questions.

1. **Amalgamation/consolidation** - Call the team responsible for the "Supra" business associate (Royalty Payer).

   i.e. ABC Oil and Gas amalgamates with Zed Exploration and Zed is the amalgamator (royalty payer). When calling Client Services regarding business for ABC Oil and Gas, you would call Team 4 (Q-Z) (780-644-1204) because Zed Exploration is now the Supra business associate and royalty payer. This rule would apply even if you were calling regarding business that is prior to the acquisition or amalgamation.

2. **Asset Purchase** - Call the team responsible for your company.
   i.e. 123 Gas purchases the assets of TSP Exploration, but not the company. When calling Client Services regarding business for 123 Gas, you would call Team 1 (# Co., A, B, & L) (780-644-1201) because you have only purchased assets.

3. **Consultants/service providers** - If you have a contract to provide production accounting services to a company, call the team responsible for your client's company.
   i.e. Paul Snow Consulting Services enters into a contract with Duckback Oil and Gas and Olive Oil and Gas. Paul Snow would contact Team 2 (C-G) (780-644-1202) to discuss Duckback Oil business and Team 3 (H-P excluding L) (780-644-1203) to discuss Olive Oil and Gas business. At the time the contract is signed, Paul Snow would have had each company notify the appropriate team that he was authorized to access information for their company.

(a) Pentanes Plus obtained as a specification gas product,
(b) Propane and Butane obtained as specification products, and
(c) Pentanes Plus, Propane and Butane contained in a natural gas liquids mix.

Note: For details on "Prior Period Amendment Effects", see Attachment 2A.

Effective the January 2009 production period, the royalty rates for **methane** and **ethane** will be calculated based on a new royalty formula. The new royalty formula consists of the sum of a price component and a quantity component. The new royalty rates will range from 5% to 50%. **Propane** and **butanes** will have fixed royalty rates of 30%, whereas **pentanes plus** will have a fixed royalty rate of 40%.

The price component of the new royalty formula royalty rate for methane and ethane is determined by the monthly methane or ethane par price (PP)

Price ($/GJ)	r_p
PP ≤ 7.00	(PP – 4.50) * 0.0450
7.00 < PP ≤ 11.00	(PP – 7.00) * 0.0300 + 0.1125
PP > 11.00	(PP – 11.00) * 0.0100 + 0.2325
Maximum	30%
Minimum	Can be negative (-20.25% if PP=0)

The par price is a provincial weighted price determined by the department and published in the Information Letter for each production month. Determination of the par price has not changed under the Alberta Royalty Framework.

The quantity component of the new royalty formula royalty rate for methane and ethane is based on the average daily production (ADP) of the well event. The quantity component is adjusted for either the depth of the well event and/or the acid gas content of the well event.

Quantity ($10^3m^3/d$)	r_q
ADP≤ (6 * DF)	[ADP – (4 * DF)] * (0.0500/DF)
(6 * DF) < ADP ≤ (11* DF)	[ADP – (6 * DF)] * (0.0300/DF) + 0.1000
ADP > (11* DF)	[ADP – (11 * DF)] * (0.0100/DF) + 0.2500
Maximum	30%
Minimum	Can be negative

The ADP for a well event is the total raw gas production in thousand cubic metres (10^3m^3) for the month divided by the total hours of production in that month multiplied by 24. The ADP formula is as follows:

$$ADP = \frac{\text{Total raw gas production}}{\text{Total hours of production}} \times 24$$

Acid Gas Factor (AGF) is a factor that adjusts the ADP of a well event if that well event is producing high amounts of acid gas, that is, if the combined concentration of hydrogen sulphide (H2S) and carbon dioxide (CO_2) is greater than 3% and less than or equal to 25%. If a well event has an acid gas content of less than or equal to 3%, then the AGF of the well event will default to 1.00. If a well event has acid gas content greater than 25% then the AGF has a minimum value of 0.78.

The AGF is determined based on the following formula:

$$AGF = [1.03 - (H_2S\% + CO_2\%)]$$

The ADP is adjusted by multiplying the ADP by the AGF, that is:

$$\text{Adjusted ADP} = ADP * AGF$$

The acid gas content of a well event, used by the department for the determination of the AGF, will be according to the records of the ERCB.

A depth factor (DF) is required for all well events, and is calculated based on the measured depth (MD) according to the records of the ERCB for that well event. Information on the MD, of a well event, can be found on the Petroleum Registry of Alberta (PRA) in the 'Infrastructure' section.

The DF is used in the determination of the quantity component (r_q) of the royalty rate; it adjusts the quantity component royalty formula for measured depths that exceed 2000 metres. The DF for a well event is determined based on the following formula:

$$DF = \left(\frac{MD}{2000} \right)^2$$

A well event with a MD greater than 2,000 metres will receive a royalty adjustment based on production from the well event. A well event without a reported MD or with MD less than or equal to 2,000 metres will have a DF of 1.00. The DF is capped at 4.00 for well events with MD greater than or equal to 4,000 metres.

If the MD is

$$\begin{cases} \leq 2{,}000 \text{ metres, then the DF} = 1.00 \\ > 2{,}000 \text{ metres and } < 4{,}000 \text{ metres, then DF} = \left(\dfrac{MD}{2000} \right)^2 \\ \geq 4{,}000 \text{ metres, then the DF} = 4.00 \end{cases}$$
